

# Carrie Bennett

VP, Client Strategy

## Experience

My background includes collaborating with physicians, hospital leaders, practice administrators and other business partners to develop and implement strategies designed to strengthen and grow targeted service lines. With over 20 years of experience in a variety of healthcare settings, I have worked with over 200 hospitals and specialty clinics to facilitate physician alignment and growth.

In addition to graduating from The College of William and Mary and pursuing an MBA with a concentration in Healthcare Administration, I am Board Certified in Healthcare Management by the American College of Healthcare Executives and actively involved with the Georgia Association of Healthcare Executives, APPL, SHSMD and others.

### Over 20 Years of Experience in a Variety of Health Care Settings

- St. Joseph's Candler Health System
- LifePoint Hospitals
- Coastal Carolina Hospital

## Interests

Curling up with a good mystery | Taking a fitness class with friends | Volunteering | Binge watching a good series with my husband Matt | Chasing my pup around in the yard | Spending time on the coastal waterways with my three kids

## Why I Enjoy Client Strategy

I find it fun to brainstorm with others on how we can build something bigger and better together. My favorite projects are those where all the parts feel scattered around the table like a broken puzzle until a team works to align the pieces together in a specific way to create a shared vision for success.

## How I Can Help

As an extension of your growth team, I will partner with you to bridge the gap between the data you need and the outcomes you expect. This may be to include quantifying missed opportunities, developing supportive plans for harnessing and redirecting targeted patient pipelines, creating purposeful tools to enhance your team's success, and communicating any unmet needs. It may also involve developing intentional tools to enhance your team's success. I will also support your team by listening and communicating any unmet needs in a way that inspires future product development. I look forward to building dynamic partnerships with key stakeholders that will help strengthen and grow targeted service lines.
